**Lee Robbins**  
on what to use  
to plug your  
spod to prevent  
bait spillage.

## PLUG YOUR SPOD WITH AN ATTRACTOR MIX

We have all suffered from spod spill from time to time, so plugging up your spod is the perfect solution. And if you can make this plug as fine and as full of little particles as possible, it will leave an attractive natural food trail in the water.

For plugging my spod in summer I use **Sonubaits Hemp & Hali Crush** groundbait and a liquidized tin of **Sonubaits Tutti-frutti Sweetcorn**. By adding a tin of liquidized corn to a bag of Hemp and Hali Crush, plus half a pint of water, you get a fine, damp groundbait mix that plugs well but releases quickly once the spod has landed. This makes a particle and flavour column straight from the surface down to your hookbait and fish will often home in on this immediately.
